

Scope and Background

International Symposium on Earth Science and Technology 2008, which was extended from previous International Workshop, is organized by The International Network for Cooperation on Earth Science and Technology (CINEST). This symposium highlights the recent achievements in the fields of Mineral Resources, Energy and Environment based on the Earth Science and Engineering. The symposium includes special session on Novel Carbon Resource Sciences. Interdisciplinary studies and discussions on the future directions of the fields are focused, and especially young researchers contributing to earth resources development and global environment are strongly encouraged.
